IntraLATA toll telecommunications remain the property of the Local Exchange Carriers (LECs). In the reseller agreements entered into by CI², the ILECs agree that dialing parity shall be available to Competitive Local Exchange Carriers (CLECs) in pursuant to Section 251(b)(3) of the Telecommunications Act of 1996.

Upon entrance in Tennessee as a reseller, CI² proposes to be the designated intraLATA toll carrier for its local exchange service customers; however, CI² will allow its customers to chose their intraLATA preferred carrier. CI², Inc. proposes to continue in that status for its customer unless the customer initiates a change.

CI² will not market its intraLATA resold toll service to customers who call to initiate local service.

CI², Inc. concurs with the other LECs' plans to implement Toll Dialing Parity, which have been submitted to the State Regulatory Commission in Tennessee.
